EDUCATION

Indala College of Engineering and Technology, Mumbai **2019 – 2023**
B.Tech - Computer Science and Engineering - ***CGPA - 8.39*** *Mumbai, Maharashtra*

EXPERIENCE

Beeyond Tech **Aug 2024 – current**
Full stack Developer *Mumbai, Maharashtra*

- Building society management Dashboard and app for guards and admins. Guards can track visitors and deliveries, notify residents in real-time, and manage entry logs efficiently. A powerful admin dashboard controls the app, enabling updates on society-related or user-specific details. Admins can send notices, circulars, and documents directly to users' app accounts. Inspired by Swiggy and Zomato, the app ensures smooth communication, enhanced security, and seamless management of both guard and society operations.
- The app is to Track Visitors and Deliveries: See who is at the door, identify delivery personnel, and verify their details. Notify Residents: Instantly inform residents when their parcels, guests, or service personnel arrive, ensuring smooth communication and reducing manual effort. Monitor Entry Logs: Maintain a clear, searchable history of visitor and delivery entries for enhanced security and accountability.

Mettler Toledo **Feb 2024 – Aug 2024**
Full stack Developer Intern *Mumbai, Maharashtra*

- Received award for exceptional performance at Mettler Toledo for significant contributions to a CEO project.Built web applications using React.js, MongoDB, and Django, implement user authentication and database operations.
- Created Python scripts for data processing and comparison, including a Tkinter GUI for improved user interaction. Developed Telegram bot using Node.js, integrating Wikipedia and Indian news APIs with interactive commands
- Developed An AI Web app where you can talk to your DataBase And you can Extract the Data using Natural language queries(English).

PROJECTS

Chat-App | Reactjs, Express, MongoDB, Socket.io, JWT **2024**

- Developed a real-time chat application that supports seamless user authentication, message routing, and dynamic real-time communication.
- Utilized schema flexibility to efficiently manage chat data and user information, while ensuring smooth integration with other application modules.

The Foodie Zone | React.js, Redux, Firebase for Auth and Database, Framer motion **2024**

- Developed an intuitive food delivery platform enabling users to effortlessly browse, select, and order items, with real-time synchronization for seamless updates on order status and product availability.
- Crafted a sophisticated admin dashboard for streamlined inventory management, order processing, and dynamic item publication, ensuring flawless operational efficiency and control.

TECHNICAL SKILLS

Technologies/Frameworks: HTML5, CSS3, Django, JavaScript, Nodejs, Express, React.js, Next.js, Typescript, Redux, Webpack, ReactNative, Bootstrap, Flask, Tailwind, MaterialUI, DaisyUI, Debugging, AJAX

Version Control: Git, Github

DataBases: MySQL, MongoDB, Firestore

Personal Attributes: Documentation Skills, Problem-solving, Effective Communication, Analytical Skills

EXTRACURRICULAR

* Appeared for the Combined Defence Services and Coast Guard examinations.
* Demonstrated leadership and discipline through participation in the National Cadet Corps.
* Do freelance work in my spare time.
